

It's estimated that 27 mammal, 24 bird, and 7 frog species have become **EXTINCT** in Australia since European settlement.

WHITE-FOOTED RABBIT-RATS were one of Australia's largest rodents. This animal became extinct in the early 1900s.

The **EASTERN QUOLL** still is found in Tasmania. However, this animal has been extinct on mainland Australia since the 1960s.

EXTINCTION
