

Mrs Sage, where are you?

- Coal Seam Gas (CSG) activity is now just 40 km away, and getting closer.
- AGL have announced that they are prepared to “**frack**” in Western Sydney.
- AGL hold an exploration licence over large parts of the lower Blue Mountains.

Real action is needed now, before the exploration crews arrive!

In December 2012 you, as our Member for Blue Mountains, were presented with a petition from more than 3000 people. This petition asked you to declare your opposition to CSG in the Greater Blue Mountains and to advocate for the removal of Greater Blue Mountains lands from AGL's exploration licence.

Mrs Sage, please let the community know what action you have taken so far. We all want to know!

See www.bluemountains.org.au for more CSG information.
