

CSG: The O'Farrell Govt's policies fail to protect our best agricultural lands and environmentally sensitive areas. Not one square inch is guaranteed protection.

“I have stood by every decision made by the government whilst advocating for the residents of the Blue Mountains.” - Roza Sage, BM Gazette 28/11/12

“I still have concerns about this issue and will be watching closely to see the impacts of our policy changes” - Stuart Ayres, Letter to Conservation Society 5/2/13

Mrs Sage, you can't always have it both ways. **Advocate** now to have the Blue Mountains removed from AGL's exploration licence.

Mr Ayres, it is right for you to have “*concerns*”, but given that many of CSG's impacts are irreversible there is simply no time to “*watch*”, it's time to **act**.
